RE: Cynthia Russo, BSN, CRNA, CLNC, EJD
Clear Choice Medical Legal Consulting

To Whom It May Concern:

Our firm retained Nurse Russo to provide expert standard of care and causation testimony regarding the negligent creation and implementation of an anesthetic plan by the CRNA involved in the care for our clients' husband and father. The patient died due to this negligent anesthesia plan. The case involved a major corporate hospital in Phoenix, Arizona and the jurisdiction was the Superior Court of Maricopa County.

Nurse Russo is one of the better nurse experts I have worked with, and I have worked with roughly thirty or more nurse experts in connection with our firm's nursing home abuse and medical malpractice sections. She is extremely prepared and well-organized and knows what to ask for (and what to decline) in reviewing records for a case.

I was very nervous as our trial neared because Nurse Russo candidly let me know well in advance that she had never provided trial testimony before. Yet, my nerves dissipated because of her preparation and readiness. She was absolutely wonderful on the stand and is a natural trial witness. Speaking with the jurors afterwards, those willing to stay behind all let me know that they completely agreed with her presentation of the facts and found her both professional and persuasive. We ultimately secured multi-million-dollar restitution for our clients.

I would highly recommend Nurse Russo if you need consultation or an expert witness regarding CRNA-involved anesthesia cases. I would be happy to speak with you directly if you would like additional comments on my experience and trial with Nurse Russo.

Very truly yours,

Fred Rispoli
