RE: Cynthia Russo

Dear Madam or Sir:

I am a registered nurse as well as an attorney who provides legal nurse consulting services. I subcontracted with Cynthia Russo to provide a review for merit.

She has saved me time and money with her services. Cynthia did a fabulous job in fairly and succinctly summarizing medical records and providing a sound basis whether or not the case had merit. She picked out the information and relevant points pertinent to my case to support her conclusion. At times, some legal nurse consultants will put everything in a review for merit and not discern what the attorney most needs to understand about their case.

Based on the services Cynthia provided, she was able to support her position that the case did not have merit even when at first blush, it sounded like it did with a death case. She was able to show why the case did not have merit because the physician used proper judgment with the tests he ordered and that other physicians acting under same or similar circumstances would have treated this patient the same way and also given the patient's clinical condition.

Cynthia is an excellent writer and is able to discern the most relevant information on your cases. I highly recommend her to review cases for merit, put together chronologies, timelines of events and condense your medical records.

Cynthia saved my attorney clients a lot of time and money by her reviewing the case. Even though she found no merit, it was better for the attorney to know now rather than spending thousands of dollars on a case that the attorney may lose.

Thank you.

Very Truly Yours,
BROWN LAW OFFICE, P.C.
